360° ACTION CAMERA
QUICK START GUIDE

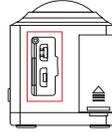

A SIMPLE HOW TO

360° ACTION CAMERA

Before you start to film or photograph that memorable moment, follow the 2 steps below so your all set for action.

1: Download the **XDV360 App**. Use a QR Scanner App and scan the relevant QR Code, or you can search **XDV360** in The App Store & Google Play.

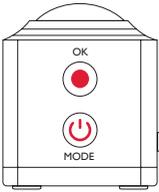

2: Insert a Micro SD Card - you will hear a clicking noise to indicate its inserted correctly. (Memory Card Not included)

SHOOT & VIEW - RECORD

You can film and record in 2 different ways. You can either record straight to the memory card and relive your footage later, or, you can record your footage and watch in Live Mode.

1: RECORD & RELIVE

1: Press & hold the 'Power/Mode' button.

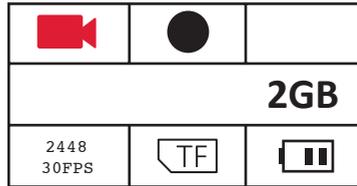

2: You can choose to record in 2 modes. You can either do a **Video Record**, or if your filming involves fast paced activities, its best to film using the **Time-Lapse** mode.

To do this, continuously press the 'Power/Mode' button until you reach your required mode. The mode icon appears in the top left of the screen.

3: To start recording press the 'OK' button on the camera, or if your using the **Remote Control** press & hold the **grey** button for 4 seconds. You will see on the camera screen, the timing appear as per the image -bottom right.

4: To stop recording, press 'OK' on the camera or the grey button on the **Remote Control**. The timing will disappear off the screen to indicate recording has finished. Your recording will save to the memory card.

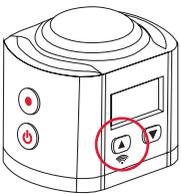

5: To relive footage, you need to connect the camera to your device using the **XDV360 app** and select **Media Gallery**. All content will be saved within that folder. Connection to the **XDV360 app** is explained below.

Remote Control

2: RECORD & VIEW IN LIVE MODE

To record footage and view it in Live Mode, you need to make a wireless connection between your chosen device and the camera. (Please note: NO internet is required to make the connection)

1: If not already powered up, press & hold the 'Power/Mode' button.

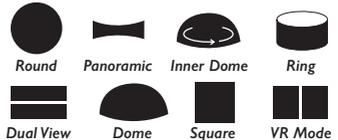

2: To make the wireless connection, first press & hold the 'Up' button until the 'Wireless Symbol' appears on screen.

3: Go to your WiFi settings on your phone & select 'STEALTH VR'. When prompted, key in the password: **12345678** and connect.

4: Launch the **XDV360 app** on your device. You will see the message 'Waiting to connect STEALTH VR' on your screen. Once connected, the **XDV360 app** menu will appear as per the image to the right.

5: Your now ready to Record, View, and Edit through the app with its on-screen controls. Choose from the eight viewing modes to easily turn your video into a mind-bending masterpiece.

(By selecting 'VR Mode' on the XDV360 app you can watch and record footage using your VR100 headset)

SHOOT & VIEW - PHOTO

To shoot photos you need to make sure that the **Photo Shooting Mode** is selected on the camera. You can shoot photos in 3 different ways...

1: On the camera, press the 'Power/Mode' button continuously until the **Photo Shooting Mode** icon appears. Press 'OK' to take a picture.

2: Press & hold the **red** button on the **Remote Control**.

3: Select **Photo Shooting Mode** icon in the **XDV360 app**.

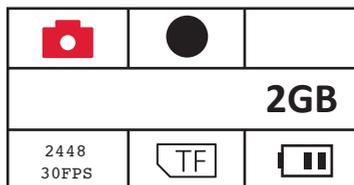

Photo Shooting Mode

Note: You can Shoot, View & Edit photos in Live Mode and also relive through the **Media Gallery**. (Wireless connection to XDV360 app needed)
